### Sharp Island EcoTour

### 香港質譜學會 — 橋咀洲生態旅遊

#### 【 About 】

Located in Sai Kung inner bay, Sharp Island has been always a favourite countryside destination in recent years. Its unique geological features contain beautiful shores and idyllic beaches with crystal water. The island is also a home to many different types of rock and a wide range of geosites.

Through the migmatization of volcanic ash, lapillus and lava over the past 1.4 billion years, the volcanic rocks have formed in different shapes and size. You may take great pictures and enjoy a few hours of exercise outside the laboratory. This walk is suitable for family and friends. Come and join and enjoy this beautiful Season of Autumn.
